

HOW TO MAKE A GREASE FILTER

1. Pick a location away from tents and sleeping areas.
2. Poke some small holes around the bottom of the bag.
3. Fill a large heavy duty garbage bag about 1/3 full with twigs and leaves.
4. Suspend the bag from a rope tied between two trees so that the bottom is a tad off the ground.
5. To dispose of, put the used grease filter in with your regular garbage. Never leave it out overnight.
